

SE Stock League

By Matthew Jackson, Paul Stanik, David Wang,
Andrew Marfitsin, Teja Madala, Joseph Coleman,
Akshaykumar Patil, and Murali Venkata Krishna
Gunti

Project Overview

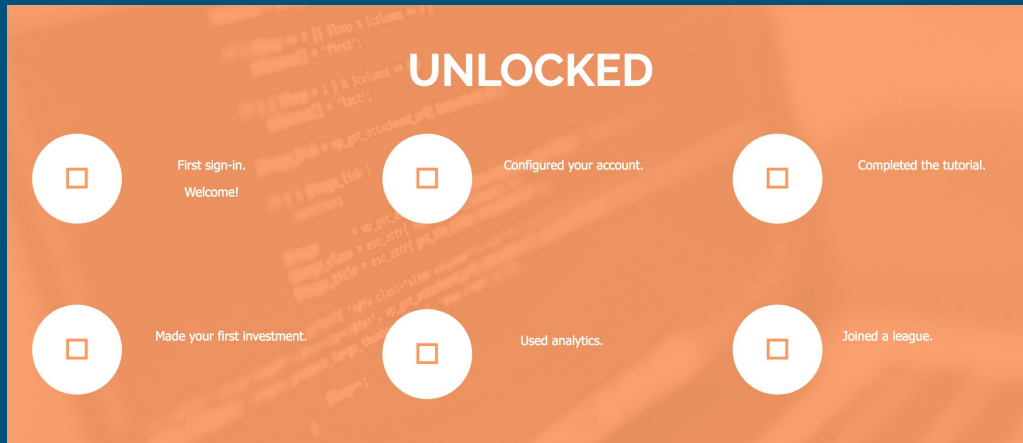

- Server hosted on InfinityFree
- Simplistic design that also includes tutorials in order to prevent intimidating new and unfamiliar players.
- Implements leagues to create a more private, competitive, environment. Play with friends or join a public league.
- Includes achievements for various accomplishments to promote staying interested and not leaving.
- Utilizes candlestick charts and other analysis tools to further assist beginner users.

In the Last Demo...

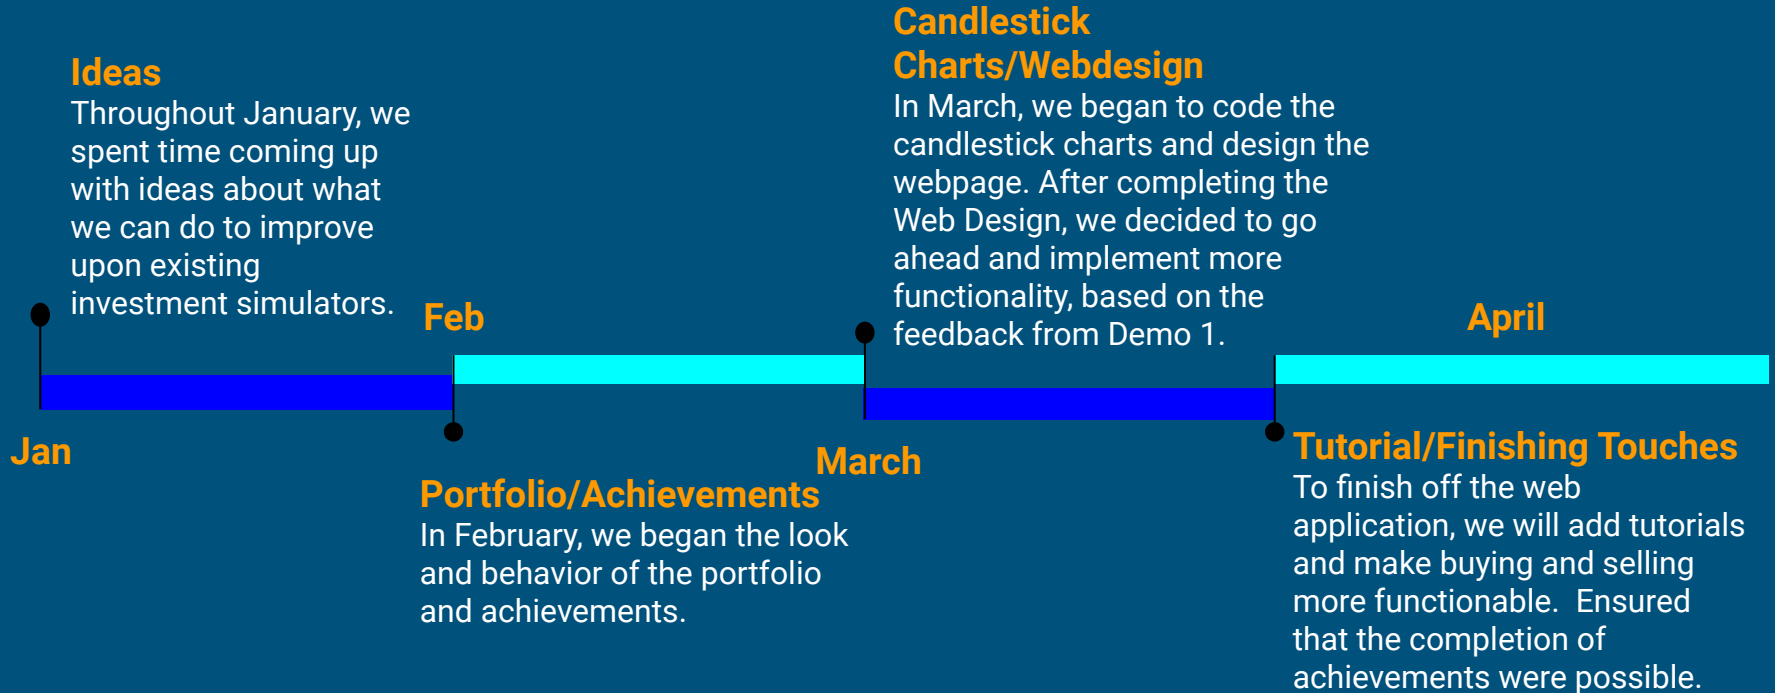

- A barebones website implementation was introduced. The overall layout was shown however functionality for certain aspects were still in development.
- Early candlestick charts were shown to work but were not yet accessible on the main webpage.
- Unable to purchase stocks yet

What we have added....

1. Registration and Login implementation
2. Achievements and ability to create leagues
3. The purchasing of stocks is now possible
