

## A PLACE FOR LEARNING

Our goal is to eliminate the intimidating aspect of using your real money to invest while teaching you important skills for the investing world. We wish to foster the desire of our clients to compete in the real stock world by using leagues and real time data analysis to generate a competitive atmosphere between our clients and allow them to experiment with different strategies, all without having to spend a dime.

## ABOUT SE STOCK LEAGUE

### Innovative Learning

Our team is dedicated to creating an information rich and risk-free environment in order to teach its users about the stock world.

Our barebones site had many exciting and interesting features in order to assist our users in their learning endeavors, such as candlestick charts, holistic comparison of stocks, and achievements for user progress.

We have added many new features and improved the quality of our site by streamlining user registration, fully implementing our competitive stock leagues, and creating our tutorial which will guide users through the process of beginning to use our stock league.

## YOUR POSSIBILITIES

Whether you are scared about investing your own money into stocks, looking to learn for academic's sake, or just want to play a fun game with your friends comparing investing efficiencies, Super Easy Stock League is the place for you.

### How we are different

- Tutorial that gives supplemental learning
- Real world emulation at no cost to the user
- Unique and informative data displays such as candlestick charts/portfolio comparisons
- Interactive leagues and leaderboards
- Real time updates, just like real life!

Super Easy Stock League  
Play. Practice. Perfect

## OUR GOALS

We wish to cater to academic institutions, first time investors, intermediate to seasoned investors looking to practice, as well as anyone who enjoys stock leagues.

### Key offerings of SE Stock League:

Our platform was created to offer growth and understanding to those unfamiliar with investing.

Through tutorials, holistic data, achievements, and competitive leagues, users will be compelled to keep competing and investing even after learning.

With league administration, users can have a completely customized experience where they can invest exactly how they want to, and learn plenty along the way.
